## 10849NAT

# Diploma of Applied Blockchain

### COURSE INFORMATION

#### OVERVIEW

Diploma of Applied Blockchain Merging Machine Learning and Artificial Intelligence (10849NAT) is a nationally recognised qualification that consist of six essential units and two optional units. The curriculum covers a range of topics, including planning for a blockchain-based business model, executing a business model on the blockchain, and facilitating an organisation's transition to a blockchain network.

The purpose of this course is to equip students with the knowledge, skills, and competencies required to secure employment in applying blockchain technologies in either an existing or a new organization. By completing this course, students can enhance their prospects of success in a rapidly growing and evolving industry.

Graduates' outcomes may vary significantly depending on their existing qualifications and experience. In general, this course aims to provide participants with the following vocational outcomes:

- Management or operational positions within an organization implementing new business models that utilize blockchain technologies to drive value, efficiencies, and new opportunities.
- Management or operational positions within an organization implementing disruptive business systems that allow the application of blockchain technologies.
- Management or operational positions within an organization tasked with developing and supervising blockchain teams.

#### DURATION

Saltera's [10849NAT Diploma of Applied Blockchain](#) is a 12-month accredited course, although depending on the student's experience and dedication they may be able to achieve the qualification in 9 to 10 months.

Saltera's works with students to tailor study programs that suit their needs. Please speak with our course advisor for more information.
