10747NAT

Advanced Diploma of Applied Blockchain

COURSE INFORMATION

OVERVIEW

The Advanced Diploma of Applied Blockchain (10747NAT) is a Nationally Recognised qualification that consists of 6 core units and two elective units. The qualification covers subjects such as analysing the performance of a business model deployed on blockchain and preparing an organisation for transitioning operations to a blockchain network.

The purpose of this course is to provide participants with a range of knowledge, skills, and specific competencies to support them in gaining employment in applying blockchain technologies within an existing or new organisation.

10747NAT Advanced Diploma of Applied Blockchain offers a great base for understanding and leveraging blockchain technology to help transform your business or to help open new career opportunities.

Career outcomes will vary depending on previous skills, qualifications and experience. In general graduates of the course lead into the following roles:

- Strategic management roles with organisations to develop new or transition into disruptive business models through applying blockchain technologies.
- Management or consulting roles for organisational research to create a new flow of value through the tenets of blockchain.
- Operational roles implementing and incorporating distributed ledger technology with other emerging technologies and legacy systems

DURATION

Saltera's [10747NAT Advanced Diploma of Applied Blockchain](#) is a 12-month accredited course, although depending on the student's experience and dedication they may be able to achieve the qualification in 9 to 10 months.

Saltera works with students to tailor study programs that suit their needs. Please speak with our course advisor for more information.
